

2026 Q2

ManpowerGroup Employment Outlook Survey

SINGAPORE FINDINGS →

Q2 Singapore Employer Hiring Sentiment

Executive Summary

More than **530** employers in Singapore reported a seasonally adjusted Net Employment Outlook (NEO) of **24%** as they forecast **Q2** staffing changes in the latest edition of the ManpowerGroup Employment Outlook Survey.

Anticipated hiring increases are driven by **company expansion**.

Expected decreases are driven by **economic challenges**.

The Q2 2026 Singapore Net Employment Outlook **improved** since the **previous quarter** (+10 points) but declined **year-over-year** (-3 points).

Construction & Real Estate

+18

Information

+20

Organizations with 250-999 employees

+19

Organizations with 50-249 employees

The data for the second quarter was collected between January 1 and February 3, 2026, prior to geopolitical developments that began across the Middle East in late February. The findings reflect employer sentiment at the time of data collection and may not capture the potential impact of subsequent events.

Employer Expectations in Singapore

 **21%** of employers reported they are anticipating **staff reductions**.

33% of employers said they planned to keep **staffing levels unchanged**. 

 **45%** of employers said they planned to **increase their staff** between April and June.

1% of employers were **unsure how staffing levels would change** in the months ahead. 

Measuring With the Net Employment Outlook

Hiring sentiment is quantified using the **Net Employment Outlook (NEO)**, defined as the difference between the percentage of employers planning to increase staff and those planning to reduce staff.

The unadjusted NEO for the second quarter of 2026 is 24%. After adjusting for predictable seasonal patterns, and to more accurately compare across regions and over time, **the NEO remains at 24%.** The seasonally adjusted figure is used throughout the remainder of this report unless otherwise noted.

*Net Employment Outlook results range from +100% to -100%

Changes Over Time in Singapore

The Q2 2026 Singapore Net Employment Outlook improved since the previous quarter (+10 points) but declined year-over-year (-3 points).

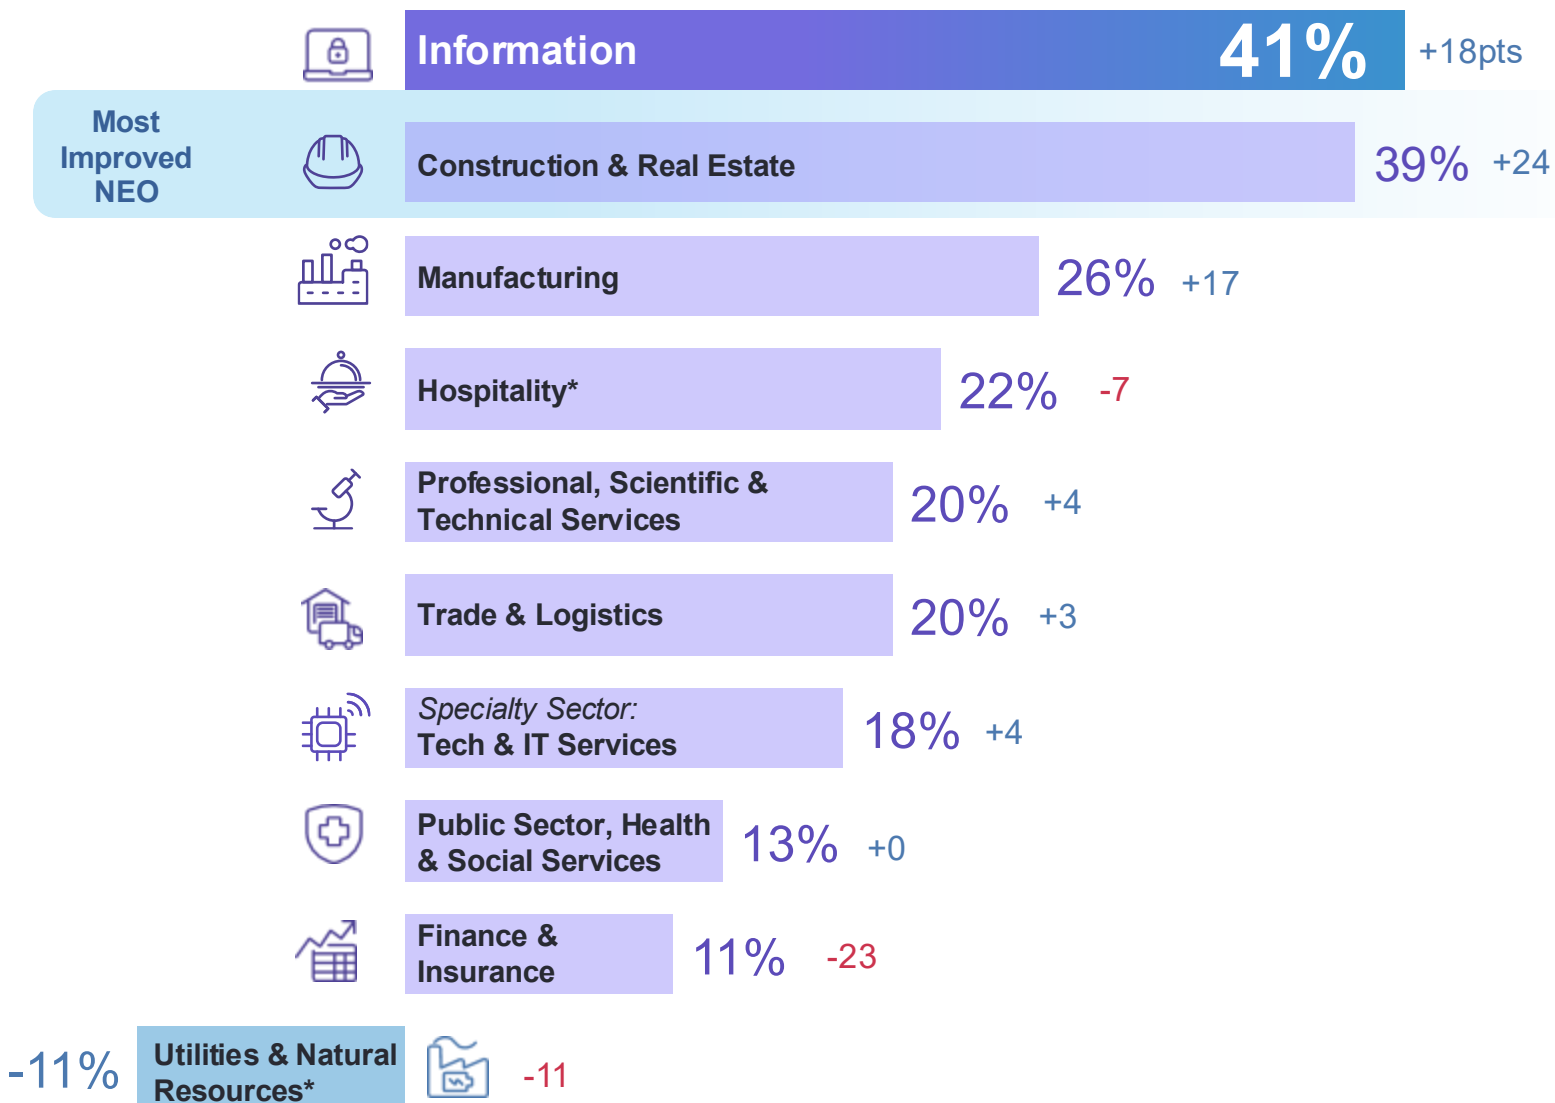

Outlooks Across Key Industry Sectors in Singapore

Employers across the **Information sector** reported both the highest and most improved NEO when compared to the previous quarter.

Note: Tech & IT Services is a specialty sector that combines subsectors across Manufacturing, Information, and Professional Services to provide a holistic view of all aspects relating to IT and telecoms.

* Figures for Hospitality, and Utilities & Natural Resources are based on small sample sizes and should be treated as indicative only. These sectors will not be considered when identifying the highest and lowest sectors.

Singapore's Hiring Expectations by Company Size

Organizations with **250-999 employees** reported the most positive NEO for Q2 2026, as well as anticipated the strongest improvement since the same time last year.

Singapore Workforce Trends

Where Employers in Singapore See the Most ROI from AI

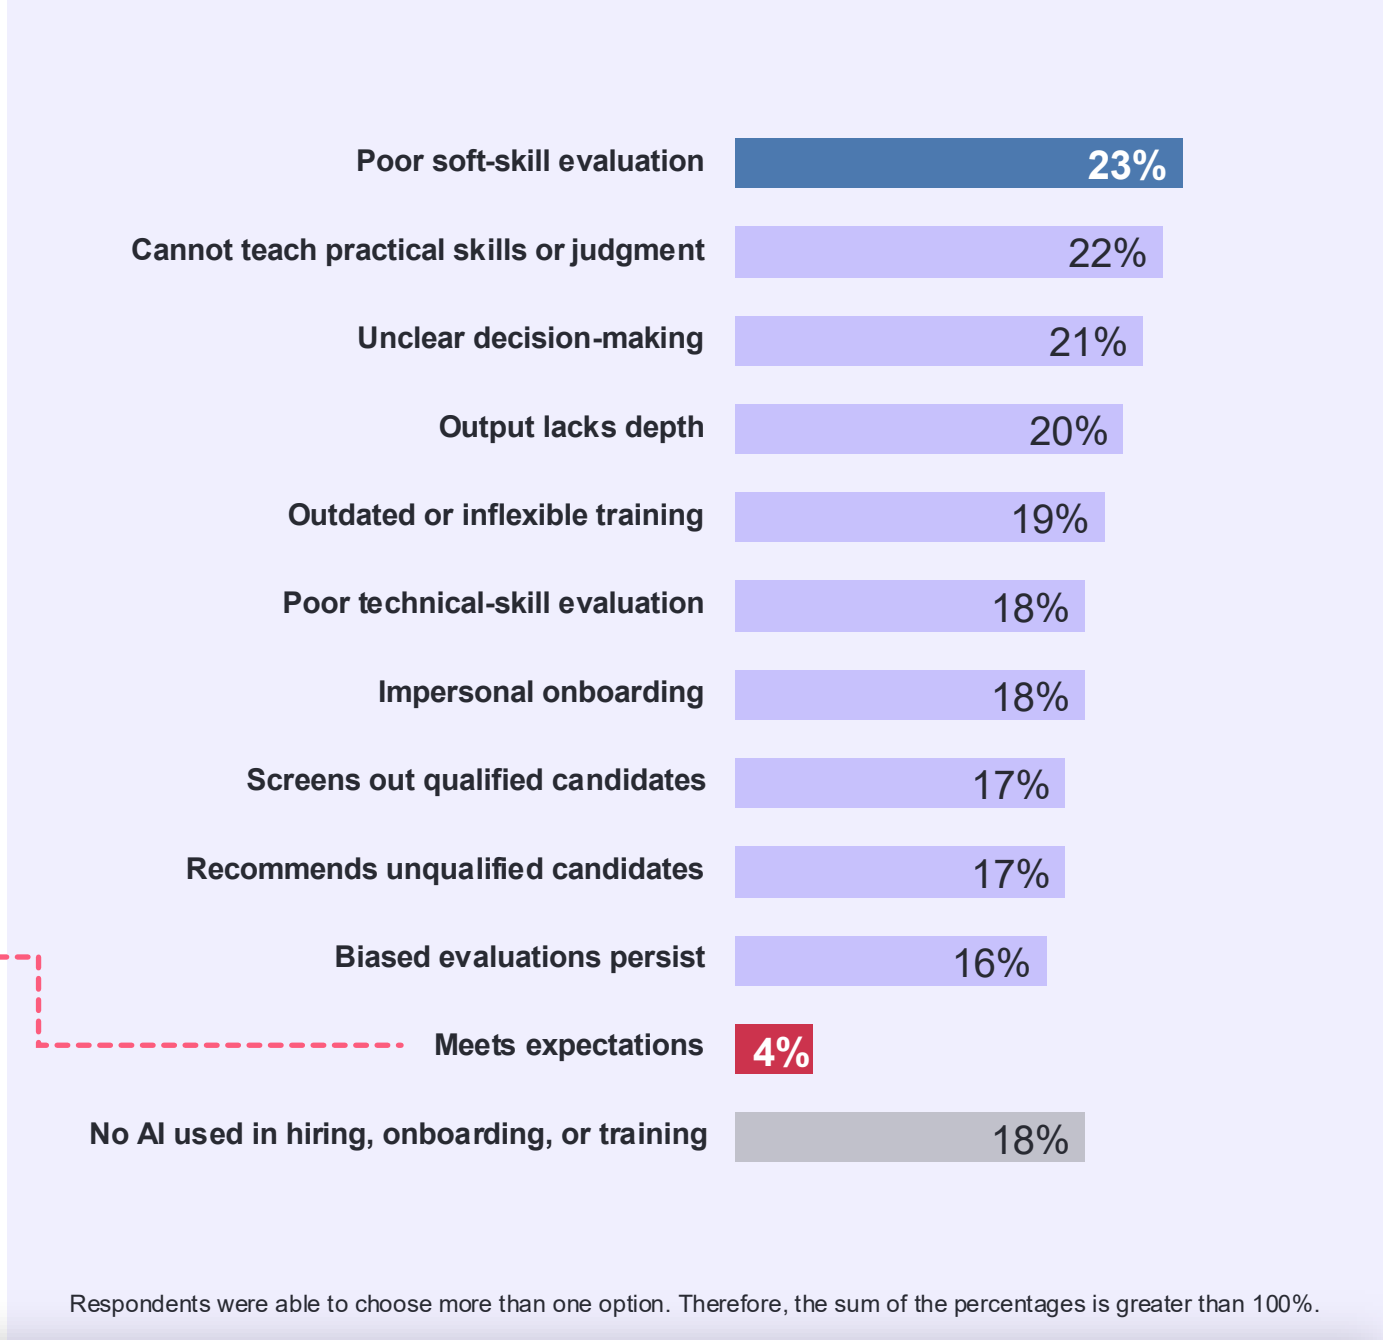

Employers say AI for **Learning & Development** delivered the **highest ROI**.

AI's Unmet Expectations

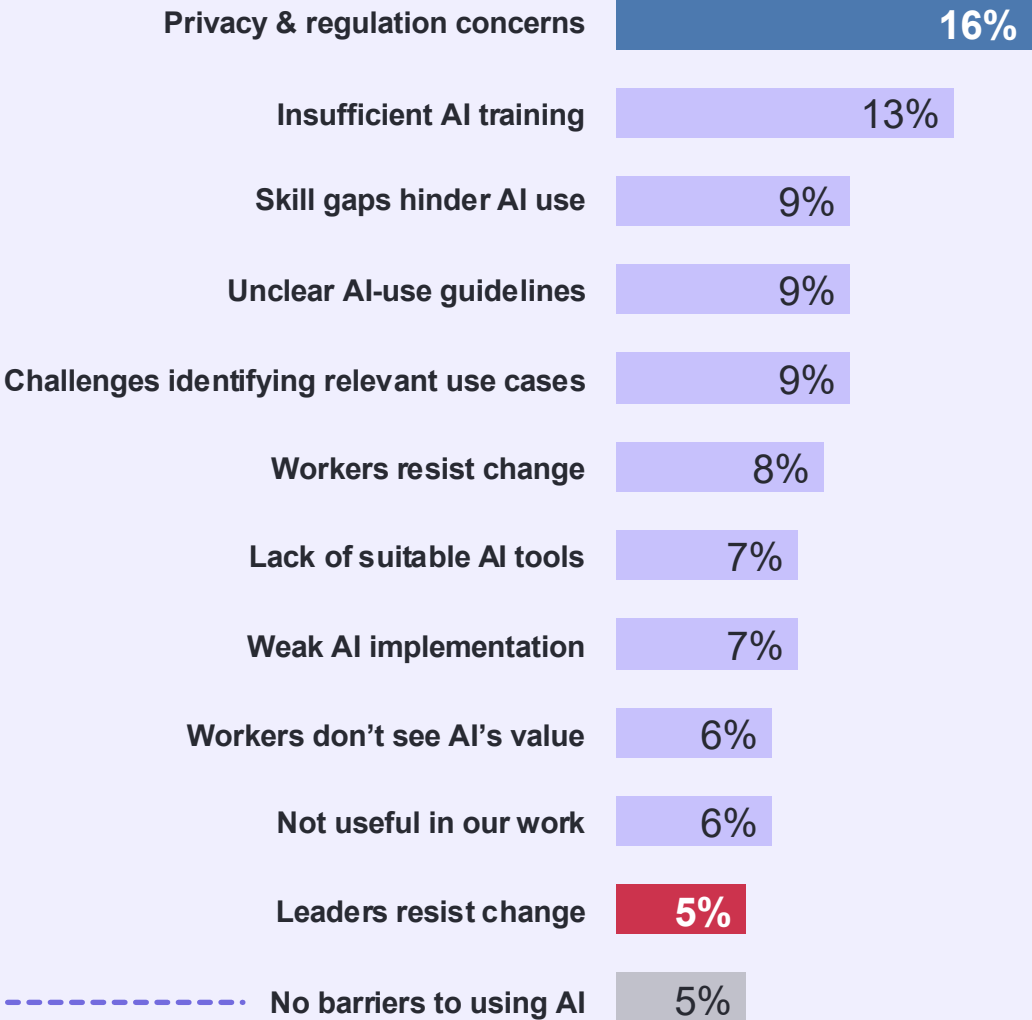

Only 4% of employers in Singapore say current AI solutions meet their expectations for hiring, onboarding, and training.

Respondents were able to choose more than one option. Therefore, the sum of the percentages is greater than 100%.

Key Challenges Workers Face with AI

95% of organizations in Singapore report workforce **challenges using AI**, driven primarily by **privacy and regulatory concerns**, with **insufficient training**, and **skill gaps** close behind.

Respondents ranked their top five barriers. Therefore, the sum of the percentages may not add up to 100%.

Skills Most (and Least) Affected by AI Augmentation

Respondents were able to choose more than one option. Therefore, the sum of the percentages is greater than 100%.

Q2 Global Employer Hiring Sentiment

Executive Summary

More than **41,700** employers across **42** countries reported a seasonally adjusted Net Employment Outlook (NEO) of **31%** as they forecast **Q2** staffing changes in the latest edition of the ManpowerGroup Employment Outlook Survey.

Anticipated hiring increases are driven by **company expansion**.

Expected decreases are driven by **economic challenges**.

The Q2 2026 Global Net Employment Outlook **improved** since the **previous quarter** (+6 points) and **year-over-year** (+7).

Strongest NEOs Reported for Q2 2026

- 38%** Asia-Pacific and the Middle East
- 68%** India
- 41%** Information
- 37%** Organizations with 250-999 employees

Most Improved NEOs Compared to the same time last year

- +10** Asia-Pacific and the Middle East
- +26** Brazil
- +14** Information and Utilities & Natural Resources sectors
- +12** Organizations with less than 10 employees

The data for the second quarter was collected between January 1 and February 3, 2026, prior to geopolitical developments that began across the Middle East in late February. The findings reflect employer sentiment at the time of data collection and may not capture the potential impact of subsequent events.

Capturing Future Hiring Plans

Since 1962, ManpowerGroup has asked organizations about their quarterly hiring plans. More than **41,700 employers** across **42 countries** reported **hiring expectations for Q2 2026** in the latest edition of the Employment Outlook Survey. Respondents shared whether their staffing levels would remain unchanged, increase through new hiring, or decrease due to layoffs or anticipated departures.

*The survey question has been modified for clarity, and the full text is available in the [About the Survey](#) section.

Employer Expectations

 **13%** of employers reported they are anticipating **staff reductions**.

 **45%** of employers said they planned to **increase their staff** between April and June.

40% of employers said they planned to keep **staffing levels unchanged**. 

2% of employers were **unsure how staffing levels would change** in the months ahead. 

Measuring With the Net Employment Outlook

Hiring sentiment is quantified using the **Net Employment Outlook (NEO)**, defined as the difference between the percentage of employers planning to increase staff and those planning to reduce staff.

The unadjusted NEO for the second quarter of 2026 is 32%. After adjusting for predictable seasonal patterns, and to more accurately compare across regions and over time, the **NEO is 31%.** The seasonally adjusted figure is used throughout the remainder of this report unless otherwise noted.

*Net Employment Outlook results range from +100% to -100%

Changes Over Time

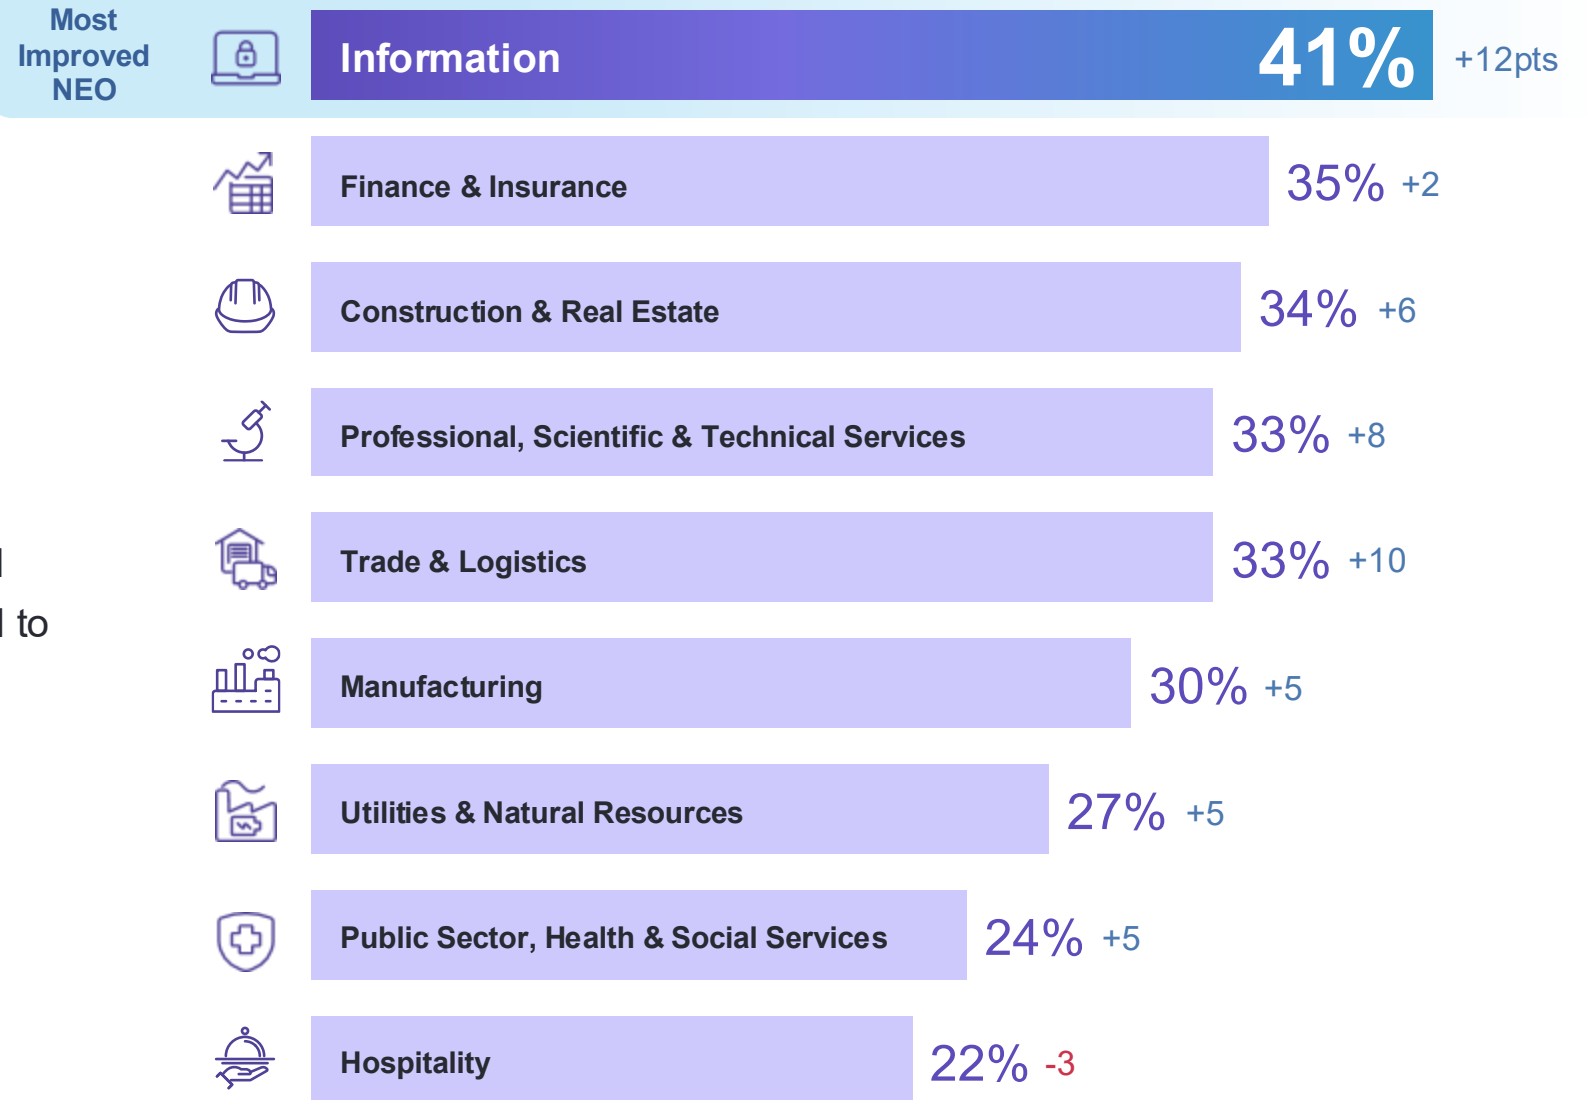

The Q2 2026 Global Net Employment Outlook improved since the previous quarter (+6 points) and year-over-year (+7 points)

Outlooks Across Key Industry Sectors

Employers across the **Information sector** reported both the highest and most improved NEO when compared to the previous quarter.

Hiring Expectations by Company Size

Organizations with **250-999 employees** reported the most positive NEO for Q2 2026, while those with **less than 10 employees** anticipated the strongest improvement since the same time last year.

Respondents were able to choose more than one option. Therefore, the sum of the percentages is greater than 100%.

About the Survey

About the Survey

The ManpowerGroup Employment Outlook Survey is the most comprehensive, forward-looking employment survey of its kind, used globally as a key economic indicator. The Net Employment Outlook is derived by taking the percentage of employers anticipating an increase in hiring activity and subtracting from this the percentage of employers expecting a decrease in hiring activity. Running since 1962, various factors underpin the success of the Survey:

Unique – It is unparalleled in its size, scope, longevity and area of focus. The ManpowerGroup Employment Outlook Survey is the most extensive, forward-looking employment survey in the world, asking employers to forecast employment over the next quarter. In contrast, other surveys and studies focus on retrospective data to report on what occurred in the past.

Independent – The survey is conducted with a representative sample of employers from throughout the countries and territories in which it is conducted. The survey participants are not derived from ManpowerGroup's customer base.

Robust – The Q2 2026 survey is based on interviews with 41,764 public and private employers across 42 countries to measure anticipated employment changes and trends. This sample allows for analysis to be performed across specific sectors and regions to provide more detailed information.

Focused – For more than six decades the survey has derived all its information from a single question (Q2 2026 example): "How do you anticipate total employment at your location to change in the three months to the end of June 2026 as compared to the current quarter?"

Survey Methodology – The data for the second quarter was collected between January 1 and February 3, 2026, prior to geopolitical developments that began across the Middle East in late February. The findings reflect employer sentiment at the time of data collection and may not capture the potential impact of subsequent events. The size of organizations and sectors are standardized across all countries to allow international comparisons.

Forward-Looking Statements –

This report contains forward-looking statements, including statements regarding labor demand in certain regions, countries and industries, and economic uncertainty. Actual events or results may differ materially from those contained in the forward-looking statements, due to risks, uncertainties and assumptions. These factors include those found in the Company's reports filed with the U.S. Securities and Exchange Commission (SEC), including the information under the heading "Risk Factors" in its Annual Report on Form 10-K for the year ended December 31, 2025, whose information is incorporated herein by reference. ManpowerGroup disclaims any obligation to update any forward-looking or other statements in this release, except as required by law.

Frequently Asked Questions

What is meant by Net Employment Outlook (NEO)?

The Net Employment Outlook is derived by taking the percentage of employers anticipating an increase in hiring activity and subtracting from this the percentage of employers that expect to see a decrease in employment at their location in the next quarter. A positive Net Employment Outlook figure means that, on balance, there are more employers who expect to add to their headcount in the following three months than those who intend to reduce staff.

What is Seasonal Adjustment and why is it used in the ManpowerGroup Employment Outlook Survey?

Seasonal adjustment is a statistical process that allows the Survey data to be presented without the impact of hiring fluctuations that normally occur through the course of the year, usually as a result of various external factors, such changes in weather, traditional production cycles, and public holidays. Seasonal adjustment has the effect of flattening peaks and smoothing troughs in the data to better illustrate underlying employment trends and provide a more accurate representation of the ManpowerGroup Employment Outlook Survey results.

How are companies selected for the survey?

Employers are selected based on the types of companies and organizations they represent. We want to ensure that our panel is representative of each participating country's national labor market, so each country's panel is built in proportion to that country's overall distribution of industry sectors and organization sizes.

Who do you interview in each company?

The person we select to interview will be someone with a good overview of staffing levels and hiring intentions within their organization. Normally this will be the head of HR or an HR manager. However, in smaller organizations, that person may be a general manager or even the CEO.

Industry Sectors Defined

Beginning with the Q1 2026 survey, the industry sectors have been updated to align with the North American Industry Classification System (NAICS). Historical data has been reclassified and will still be available as defined below.

Construction & Real Estate: Construction; Real Estate; Building Products; Construction & Engineering; Trading Companies & Distributors; Other Industrials Sub-Industry; Construction Materials; Real Estate Management & Development; Construction of Buildings; Heavy and Civil Engineering Construction; Specialty Trade Contractors; Rental and Leasing Services; and Lessors of Nonfinancial Intangible Assets.
